This page says

OK
User Info
Enter Name:
ROHAN
Enter Age:
20
Submit
Welcome, ROHAN
Your age is: 20

5. Result/Conclusion:

The basics of JavaScript were successfully demonstrated by writing a script that captures user input (name and age) and dynamically updates the DOM to display a personalized greeting. The use of console.log(), console.info(), console.warn(), console.error() and console.table() for debugging in the browser console was also studied and verified, along with linking of internal and external scripts to an HTML page.
